DETAILED DESCRIPTIONS

Database Description:

Our database houses information describing the relationship between plants, employees, customers, and the order to cash process.

Form Descriptions:

Order Input Form:

This form allows the user to input orders to the database. Include the ability to search for customer name, employee name, and the product names. It also includes information such as the product information, the quantity, weight and cost for each item.

Inventory Management Form:

This form allows employees to update inventory levels for each plant since it includes the plant number and the product name. The form also have filed such as quantity on hand, quantity on order, quantity backordered and the reorder point.

Non-Compliance Form:

This form allows IP employees to report any incidents of non-compliance with carriers as well as the violation date.

Navigation Form:

This form allows IP to access all the reports and forms within one tab.

Report Descriptions:

Inventory Report:

This creates an inventory report for each plant. It includes relevant information about the product(s) and the plant including all relevant inventory information (QOH, Quantity on Order, Quantity on Backorder, etc.).

Customer Orders:

This report contains the number of orders and the total cost of all orders placed by each customer (be sure to also include customer contact information), including the ability to search by customer and a date range. It identifies the top customers as well as customers who have not placed any orders, within a given date range, to target their marketing efforts.

Employee Recognition:

This report generates a list of employees who have worked for IP for 5, 10, or 25 years. It only includes current employees. It also includes relevant information so each employee can be recognized for his/her years of service. If the employee is a Sales Team Member, it provides information about the number of orders the employee has submitted. If the employee is a Planning Team Member, it provides information about the number of shipments they have managed.

Non-Compliance:

This report creates a list of carriers with code of conduct violations. For each carrier, it specifies which principle(s) was violated and how many times the violation occurred within a given year.

Sales Team Performance:

This report provides the number of orders submitted, and the amount of revenue brought in by each Sales Team Member in the last month. It also identifies the top performers on the Sales Team as well as the Sales Team members who are not meeting expectations/goals.

Low Products:

This report identifies any products that are lower than 1.5 times their reorder point.

Employee Course Completion:

This report identifies all employees and any classes they have completed, as well as the date that they completed said class.

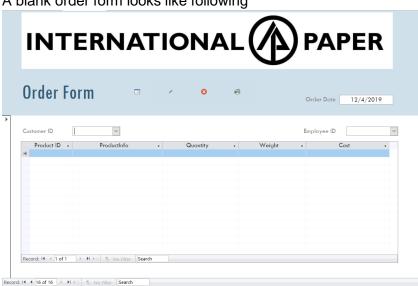

HOW TO MANUAL

How to Add a Sales Order Using the Form

Select sales form from the form panel

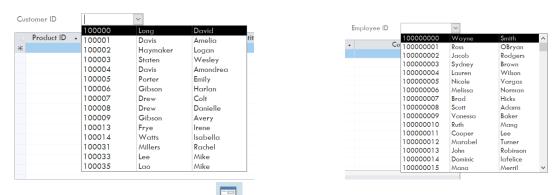

A blank order form looks like following

The date is auto-generated to be today's date, but you can also type the date you wanted.

Select customer ID and employee form the drop down box.

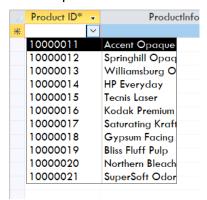

If it is a new customer, click the button to navigate to customer form.

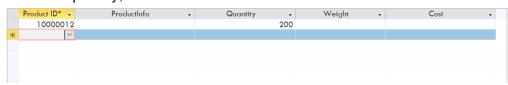

Enter the customer information, * represents required fields

Once new customer information entered, click button to go back to order form.

Select a product ID from the drop down list.

Enter the quantity, and click next row to add more items in the order

How to Generate a Report

Once the order is finished, click to close the form.

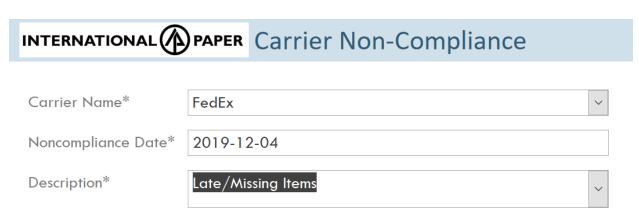

Click for to print a paper copy if needed.

How to Add Instances of Carrier Code of Conduct Violations

Select Carrier Non-compliance Form from the form panel

An empty from looks like this, with the date being automatically set to today's date. This can be edited to reflect past dates, but cannot be any day in the future.

Using the dropdown boxes, enter the name of the carrier and the type of violation that occurred.

How to Update Inventory Levels
Select Inventory Management Form from the form panel

INTERNAT	TIONAL PAPER	Inventory Ma	nagement Form
Product Name*	V	Plant ID*	V
Qty on Hand		Reorder Point	
Qty Order			
Qty Backorder			

An empty Inventory Management Form looks like this. Using the drop down menus, select the Product Name and Plant ID you wish to create.

INTERNA	FIONAL PAPER INV	entory Manage	ement Form
Product Name*	Williamsburg Opaque Offset PLUS V	Plant ID*	10000000 ~
Qty on Hand	10,000	Reorder Point	8,000
Qty Order	376		
Qty Backorder	0		

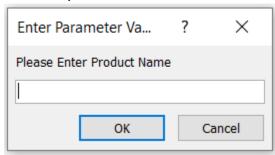

If you are updating the inventory amount during an audit, find the record that corresponds to the Product and Plant combination and manually change the records.

How to Check Inventory for a Certain Product

Select 'Inventory Report by Product' from the report panel

Enter the product name

Sample report looks like following:
